Indiana Music Education Ensemble Standards

Indiana Department of Education

2018 Indiana Music Education Standards

Introduction:

Music, along with the other fine arts, is a critical part of both society and education. Through participation in music, individuals develop the ability to think creatively as they work both individually and with others to develop skills, gain understanding of musical ideas, and produce musical products via performance, composition, and improvisation. These abilities to think critically and creatively, communicate effectively, and collaborate are ones that enable today's students to navigate future professional environments successfully as they become life-long music participants.¹

Educators utilize standards to determine those understandings and skills that all learners should experience within a given education program. In keeping with this spirit, The 2018 Indiana Standards for Music Education describe the goals, conceptual ideas, and musical skills that should be a part of a well-rounded music program. In designing these standards, the planning committee utilized the backwards design process in which educational outcomes were first identified that then guided the development of enduring understandings, essential questions, and learning indicators for each stage of music instruction. ²

What follows is a description of the development process for these standards, along with a brief overview of the supplementary materials included with the 2018 standards. The committee believes that these standards provide a framework in which highly skilled music education specialists can develop and implement a curriculum that is engaging, artistic, and meaningful for all students.

Development Process:

The process for revising the Indiana Music Education Standards began in the fall of 2016 when a committee consisting of educators from around the state was assembled to begin discussions regarding how a revised set of standards might best serve the students and music educators in Indiana. After an initial meeting in January, 2017, a set of 11 anchor standards for music education were developed and sub-committees were formed to develop learning indicators for various grade/experience levels. These standards and indicators were reviewed by the entire committee and revised in early May. After seeking feedback from educators throughout the state, the standards were revised based on these comments and the final draft was completed in August, 2017

In developing the standards, the committee was charged with examining the 2010 Indiana State Music Education Standards, the 2014 National Core Arts Standards, and music education standards from other states as a way of determining the most effective course of action for Indiana.³ The proposed standards include specific elements from each of these sources in a way that the committee feels will provide broad guidelines educators can utilize as they think about developing curriculum. The following paragraphs provide a brief overview of the structure of these standards.

The Partnership for 21st Century Skills includes a description of the skills necessary for learners to be successful in the professional field on their web site: www.p21.org.

SEAL STALE ON THE STALE ON THE

Indiana Department of Education

The committee utilized the four artistic processes from the 2014 National Core Arts Standards to organize the anchor standards for music education. These processes are ordered based on the ways that music is experienced. People first (1) CONNECT with music and then (2) LISTEN and RESPOND to it. Individuals then use these experiences to develop the capabilities which allow them to (3) PERFORM and (4) CREATE music. The 11 anchor standards are the overarching objectives related to these artistic processes that students should experience during the course of a high-quality music education program. The committee chose to include anchor standards that utilized and highlighted musical behaviors, including ones, such as movement and audiation/aural perception, that have not been a part of past standards.

Audiation is a term that as been utilized in music education for many years, but this is one of the first illustrations of the term being applied to music education standards. Audiation is defined as the ability to hear and comprehend a piece of music when the sound is not physically present. This ability to hear music internally and represent it through movement or symbol systems such as notation is a crucial component of musical understanding, and this led to including audiation and aural perception as a part of the anchor standards.⁴

After developing anchor standards, the committee examined the enduring understandings that students should develop for each anchor standard, along with the essential questions that should be addressed for each standard. Indicators of learning were then designed for each music education setting. For general music, these indicators are organized by grade bands (pre-K; K-2; 3-5; 6-8; 9-12) and they describe outcomes that should occur at the end of each grade band. Due to the fact that performing ensembles often include members from a variety of grade levels, indicators for these groups were organized based on the experience level of each ensemble (Beginning; Intermediate; Proficient; Advanced). In writing these indicators, the committee chose to utilize verbs that reflected different levels of understanding as described in *Bloom's Taxonomy* and Norman Webb's *Depth of Knowledge* to ensure that indicators reflected different levels of understanding and mastery.⁵

Supplementary Information

In addition to the 11 anchor standards, enduring understandings, essential questions, and learning indicators, the committee has also created a set of instructional examples for each of the indicators. These examples provide a specific illustration of an instructional experience that would address the indicator in question. These examples are meant to provide illustrations of possible ways to address indicators, but teachers should treat these simply as examples so they feel free to develop their own instructional ideas based on knowledge of their own students and their expertise as music educators.

A glossary was also developed to support the standards. Words that are bolded within the standards are words that can be found within the glossary. The glossary is not an exclusive list of words but developed to support building background knowledge of music vocabulary.

Indiana Department of Education

What are the Indiana Academic Standards?

The Academic Standards are designed to help educators, parents, students, and community members understand what students need to know and be able to do at each grade level, and within each content strand, in order to exit high school college and career ready. The standards set the baseline for each grade band and/or course level.

What are the Indiana Academic Standards NOT?

1) The standards are not curriculum.

While the standards may be used as the basis for curriculum, the Indiana Academic Standards are not a curriculum. Therefore, identifying the sequence of instruction at each grade—what will be taught and for how long—requires concerted effort and attention at the district and school levels. While the standards may have examples embedded, and resource materials may include guidelines and suggestions, the standards do not prescribe any particular curriculum. Curricular tools, including textbooks, are selected by the district/school and adopted through the local school board.

2) The standards are not instructional practices.

While the standards demonstrate what Hoosier students should know and be able to do in order to be prepared for college and careers, the standards are not instructional practices. The educators and subject matter experts that worked on the standards have taken care to ensure that the standards are free from embedded pedagogy and instructional practices. The standards do not define how teachers should teach. The standards must be complemented by well-developed, aligned, and appropriate curricular materials, as well as robust and effective instructional practices.

- 3) The standards do not necessarily address students who are far below or far above grade-level.
 - The standards are designed to show what the average Hoosier student should know and be able to do in order to be prepared for college and career. However, some students may be far below grade level or in need of special education, and other students may be far above grade level. The standards do not provide differentiation or intervention methods necessary to support and meet the needs of these students. It is up to the teacher, school, and district to determine the best and most effective mechanisms of standards delivery for these students.
- 4) The standards do not cover all aspects of what is necessary for college and career readiness.

 While the standards cover what have been identified as assential skills for Hoosiar students to be

While the standards cover what have been identified as essential skills for Hoosier students to be ready for college and careers, the standards are not—and cannot be—an exhaustive list of what students need in order to be ready for life after high school. Students, especially younger students, require a wide range of physical, social, and emotional supports in order to be prepared for the rigors of each educational progression (elementary grades to middle grades; middle grades to high school; and high school to college or career).

		MUSIC-ENSEMBLES: Connect				
	Anchor Standard 1: Connect with experience.	Anchor Standard 1: Connect with a varied repertoire of music by exploring the relationships between music and personal experience.				
1	EU: Musical preferences are ofte	en informed by personal experienc	ce and encounters with music in d	aily life.		
-	EQ: How do individuals experien	nce and connect with music and d	evelop preferences?			
	EQ: How do individuals perceive	and judge music that remains ou	tside of their preferences?
